

Technical drawing of a circular part, likely a cross-section of a wheel or a similar component. The drawing shows three concentric circles. The outermost circle has a radius of $R65$. The middle circle has a radius of $R48$. The innermost circle has a radius of $R55$. The drawing includes dimension lines and arrows indicating the radii and diameters. The overall diameter of the outermost circle is 130 (indicated by a dimension line on the right). The diameter of the middle circle is 96 (indicated by a dimension line on the right). The diameter of the innermost circle is 110 (indicated by a dimension line on the right). The drawing also shows a horizontal centerline and a vertical centerline intersecting at the center of the circles.
